

The above figures are only in reference to Europe and North America.

Although Italy figures at the head of the list, the figures speak little in favour of the Italian element in the Argentine Republic. The correspondence with France are large, considering the number of Frenchmen in the Republic, which is certainly only a quarter of that of Italy; on the other hand, it must be taken into consideration that Argentines make a large consumption of French works, which very naturally leads to a large exchange of correspondence. Anybody who peers into the windows of the native libraries will see them crammed with French productions of every kind, and more especially scientific.

Great Britain figures fourth in the list with 136,000 letters; the latter figure shows that the Britisher is the most industrious letter-writer, since the number of Englishmen in the Plate is a drop of water in the Italian ocean. In the Plate, herein an Englishman beats all other nations, and the figures of the London Post Office will easily convince the most incredulous as to the gigantic capacities of our countrymen in the correspondence line.

Although Spain is the mother-country of this republic, to judge from the post-office relations, there are not many times between both countries. Italy and France beat Spain.

A novel feature in these figures is the correspondence with the North of Europe, a correspondence which has sprung up very lately, and is attributed to the emigration coming from those distant shores. The figures to these countries are certainly not large, but they point in a new direction, since these letters, if they come from prosperous farmers in this country, will lead to emigration of thousands. The Post Office has done wonders in attracting the Italian emigration; the same may take place with the North of Europe, and more especially with Germany and Russia.

Correspondence between this country and the United States is at a very low ebb, no doubt owing to the want of a line of steamers with the great Republic. But an increase of relations in those parts is a mere question of time—it must come sooner or later.

EDITOR'S TABLE.

The French steamer Niger arrived yesterday at Montevideo with later dates. Ceteawayo has been set at liberty, Switzerland is taking steps to get rid of the Nihilists, Socialists etc., who have taken refuge within her borders. The Empress of Brazil is better. The mails will be here this morning per Cosmos.

The delicious weather yesterday knocked everything else out of people's heads, and the sailing of the mail, the Ohlian treaty, the whereabout of Latorre, everything was forgotten for a time in mutual congratulations on the seasons feel of the temperature. Everybody looked as if he had just received from his broker a cheque for a slashing profit on National Bank shares. What a pity that the Lujan Races were postponed. "Quien sabe" if the two Ws will permit them to come off on Monday next.

It has leaked out that the race for the honour of being chief town of the province will lie between Belgrano and Ensenada, the latter having more backers, as all the Batemans as yet born would be puzzled to make a port at the former place. It is said that Governor Roach is fully determined to have this important matter finally settled before a fortnight is about.

There is nothing new at Montevideo. They have got Knights of the Morning—Peep-o-Day Boys—down there now, to match the Knights of the Night here. The news of two conspiracies being on foot here to blow Santos over the moon causes uneasiness in Montevideo.

Congress has passed the Lottery Bill between night and morning. Nobody knew that the project was down for discussion at all. It might have been as well, or perhaps a great deal better, for the National Parliament to have passed some of the numerous gravely important Bills before it is thinking of the Lottery. The dentists of Montevideo and Uruguay will now make fortunes, as the passage of this Bill will cause terrible gnashing of teeth and consequent damage to teeth in both places, as they may bid a long farewell to any more money from Buenos Ayres for Lottery tickets.

The Rev. Mr. Foran, of the Falkland Islands, left town yesterday for Mercedes, where he will stop for a few days.

All the Flores residents are now up to their eyes in their quintas and gardens. It is pleasant to trot out at break of day and see the brokers, merchants, bankers and editors all digging away, and most of them planting potatoes.

We call attention to the very important meeting of British Hospital subscribers called for 27th inst., in reference to building a new hospital.

Our colleague the *Tribuna Nacional* had, in its issue yesterday, an interesting article entitled the four-leaved shamrock. We recommend it to those who are deep in the capital question.

£1,500 go home to London to Messrs. Siemens and Co. for electric lights for the new Exhibition building at the Once. The shares of the Exhibition Co. are in demand at 5 per cent premium. We believe they will give 50 p. cent.

At a quarter to eight o'clock to-night, at the Teatro de la Opera, Auber's beautiful overture to 'Le Cheval de Bronze,' will strike up. At eight o'clock exactly the curtain will rise. The two acts of 'Cheval de Bronze' will be given straight off, there will be an interval of 10 minutes for visits and refreshments. At twenty minutes to ten the burlesque of 'Fausé,' and at 11 o'clock carriages and trams will be waiting to convey auditors and actors to their homes and blankets.

Information is desired at the American Consulate in regard to Charles Schum, who came out as steward in the U.S. Frigate Marion, and was subsequently discharged. The last intelligence concerning him received by his parents in the United States stated that he was sick and destitute in Buenos Aires.

Great complaints are heard on all sides about the present prices charged by the butchers for meat, they being out of all proportion to the price of the live animals at the killing grounds.

Yesterday, the examinations took place at the Military School at Palermo. The pupils will shortly proceed on an excursion to Entre Rios, for the purpose of making some practical studies in fortification.

The Italian inhabitants of this city and province are making great preparations to celebrate the anniversary of the entry of the Italian troops into Rome. The 20th of September is likely to be a merry day for all the sons of sunny Italy, not only here but in every part of the world.

The prisoners taken for stealing the body of the late Mrs. Dorrego, were yesterday removed from the police station to the Penitentiary to await their trial. It is reported that the heirs of the deceased lady are annoyed by anonymous letters threatening vengeance.

Our indefatigable subscriber, Capt. Monton, distributed yesterday a rosy pamphlet with important details about his 'Alta-Voz' Telephone, with a list of his subscribers to same in this city. Half the leading men, merchants, banks, brokers and companies in town use the captain's telephone, President Roca himself standing at the head of the list. Go it, captain!

Tigers at Saladillo are an exhilarating novelty, and will recommend that place as a sanatorium for nervous invalids whose spirits require rousing. Several men met a tiger down there the other day in the open camp. They had guns with them and put three balls into him, but when one of them approached to see if he was dead, the brute sprang at him and mangled him fearfully before the others ran up with their knives and despatched him. The poor man fought desperately, but the tiger had the advantage of him.

The Club Industrial holds a meeting to-day about the projected Merchants' Bolsa. Two Bolas are not wanted here. The existing one could be reorganised so as to meet all the wants of the mercantile as well as the monetary community. There is a way to this required reorganisation, but we doubt if there be the will to take it.

Part of the barranca on the river tumbled into the other night at Santa Fe, and two structures, bearing the courtesy title of houses, were demolished, but no personal accident occurred, although the storm was very severe.

The Britannia had fearfully stiff weather on her way round from Valparaiso, but laughed at Neptune and all his stormy tricks, as the big ships of the Pacific line generally do.

A Road Locomotive for War Purposes has been successfully tried before Count Molke and other authorities. It drew 5 guns and their carriages completely equipped, the load being 7,800 cwt. It ran 24 hours, and is capable of drawing 30,000 cwt. The expense is two marks an hour. The rate of speed equals the march of infantry, but could be increased. No accident, and all went well and complete.

Yesterday evening proving to demonstration that the attempt to raise the value of the paper dollar by high discount rates and restricted circulation is all but a dream at the best—a financial nightmare, in fact.

How are you off for soap—or rather for Sapolio, the Italian equivalent for it? Mr. Collins, agent for Messrs. Enoch Morgan Sons & Co., has just introduced to this market, under the above name, a polishing and cleansing soap of such extraordinary qualities that all the housewives in town must inevitably go off their heads about it. It will clean and polish anything under the sun, from a tin can to a rusty coin, and there is an enormous consumption for it in the U. States.

Mr. Collins (whose real name we suspect to be Collini) has an Italian cast of features, although he says he is an Irishman, and his method of advertising is quite a novelty, viz., a neat little illustrated pamphlet entitled 'Rymes from ye Play of Py-nafore' in which the virtues of Sapolio are set forth to airs from this famous play. Ye Rymes are in English, not in Italian; but that's nothing.

Our native colleagues have, somehow, got hold of the news that Dean Dillon has 60,000 Irish emigrants ready to start for this country. We have not received this news, but shall be glad to hear it confirmed—when the free farmers are surveyed and ready for the reception of the new comers from old Erin.

We are charmed to see the Society for the Protection of Cruelty to Animals is making an effort to get on its legs again. The President sent us a polite note yesterday stating that a meeting will be held to-morrow at 7 1/2 p.m. in the American Church, and we hope to see some practical results this time.

Never was such a Society so badly wanted before in this city, the scenes of revolting cruelty to horses and other animals being now more frequent than ever. Its National Government and Municipality should back up this Society in every way, so as to rid the Capital of the piteous and inhuman scenes daily enacted in its streets with perfect impunity to the brutal perpetrators.

There will be fortnightly Flower Shows during the summer, to commence in the first week of October.

Mr. Bateman's plans and proposals for finishing the City Improvement Works were read at a meeting of the Water Board yesterday evening.

The Cabildo clock has gone completely to the dogs. At twenty minutes past noon yesterday it took a sudden fit and struck 68 before it stopped, out of breath, or rather out of cord. There is something out of joint with this precious clock, which has never recovered the shock to its nerves when removed to admit of the Cabildo tower being pushed towards the Sun, Moon and Stars.

The burglar fraternity went for a rise in a biscuit shop in Calle Mexico on Wednesday night, and cleared \$99,400 mpc by the speculation.

They might as well have taken the even \$100,000 while they were about it, but perhaps they took the \$6000 in crackers as became 'crackers.'

There was an 'incident' (anglic boxing match) yesterday in the street between two Municipal employees. Both were arrested.

Here we are again! The Committee of the National Chamber of Deputies have reported in favour of an export tax on cattle. Political Economy where art thou?

Colonel Bosch, Governor of the Onafo, has arrived in this city. We feel much pleasure in saluting him. Letters from Caracaras state that the wheat crop about there looks most promising; but can words express the dismay of the hard-working colonists at seeing a few days ago not one but many dense clouds of locusts flying over their fields.

The new ironclad Admiral Brown is on the way out at last. Minister Garcia has written to the Minister of War to say that she would leave England about the end of August. She is lighted by electricity.

A subscriber who says that 'talk is the ruin of this country, and that there are already too many facilities for it, sends us the following about Telephones:—

"It is but a very short time since everyone here was crazy about telephones, and people thought it was indispensable to have telephonic communication with the butcher, baker, and candlestick maker; so miles and miles of wire were placed over the roofs of houses, but the working of this immense apparatus is still in abeyance, as the necessary machinery has not yet arrived. Mr. Keyser has retired from the important post of agent for a large company, and people now await the arrival of Mr. Mathew Forrester to settle the matter. It certainly does not follow, because telephonic communication is much used in New York that it should be indispensable in South America; in the former country the value of time is well known, whereas in the latter time is not considered to be of any value whatever."

The Shopkeepers' Assistants are getting up a Sunday Closing movement, and we hope they will succeed. They are overworked, owing to the pernicious custom of keeping shops open on Sunday.

To Irish Catholics
The sons of Irishmen in the Plate can now receive, within a few leagues of their homes, on the banks of the River Lujan, and under the very shadow of the Venerable Sanctuary of Our Lady of Lujan, an education in every way adapted to the peculiar circumstances of the Irish in this country.
The Director is an Irish Priest. The terms are exceedingly moderate. For further particulars apply personally or by letter to the Director, Bernardino de Niza, Sr. de Lujan, Villa de Lujan.
